Over-arching Systems Questions:
How can PI better support the Preschool Expansion Grant/Community Systems vision of (a) finding and enrolling those with highest need as early as possible and (b) making sure they get continuous services from prenatal to school-age?

How can center-based models be better defined, and what's the strategy for expanding them? They get the best outcomes, but they can't be operated at current funding levels, and child care collaboration models might be missing the neediest families.
